

10/29 Microsite Meeting

CD: Manuel

Designer: Julia

Doesn't need to be a professional website informative-wise

Possible incorporation of Greek language (I can advise that)

Greek vases designs incorporated as possible header?

Nav bar maybe does stay at top? With Greek designs reminiscent? Of necks of Greek vases

Manuel provide Color pallete

Manuel find photos

- I think its on you to find images that fit your design, but i like the idea of doing historical paintings and stuff of helen, but posterized and gradient mapped to resemble the colors of greek pottery. However you wanna treat them is cool

- Theres a lot of geographical stuff youll end up using, I think countries can just be silhouetted

Manuel look into website references:

-<https://www.awwwards.com/inspiration/kalso-mega-scrolling-storytelling-experience>

Obviously not this detailed with parallax, but id love taller pages with images going down and telling the story of Helen of Troy. Dotted line taking you paragraph to paragraph could be cute, very voyage-y which fits.

Black or dark body text

Accent text in orange

Backgrounds in white or light beige?
